## About us...

### SunnyDays Therapy, Inc

SunnyDays Therapy is dedicated to providing excellent care to children of all ages. We strive to help children reach their maximum potential by using a variety of techniques and approaches.

The goal is to make therapy fun for the child. Families and caregivers are involved in our treatment approaches in order to improve the child's success.

We specialize in treating children with Autism Spectrum Disorders and have education and experience in integrating Applied Behavioral Analysis and Verbal Behavioral approaches into therapy sessions.

### What is occupational therapy?

Occupational therapy is a profession that focuses on helping children participate in daily life activities or occupations that are desirable or meaningful to them. Occupational therapists identify areas of difficulty and work on improving skills in those areas.

The occupational therapist also identifies the patient's strengths and encourages the child to build on those strengths to improve their overall level of function. Through specialized treatment, occupational therapists strive to make the learning environment fun and enjoyable for each child based on their needs, so that they are motivated to learn.

Treatment may focus on a variety of skill sets including, but not limited to:

- Fine motor skills
- Gross motor development, such as balance, strength and coordination
- Motor planning development
- Self-care skills
- Home programming
- Sensory-based and other behavioral interventions
- Play skills

#### ***Family Friendly Hours:***

For your convenience, SunnyDays Therapy offers expanded evaluation and treatment hours. We are open evenings and weekends upon therapist availability.

#### ***Our Services:***

At SunnyDays Therapy, we offer specialized services for children with Autism Spectrum Disorders from birth through 18 years of age. By specializing in treating only children with Autism Spectrum Disorders, we have the knowledge and experience to meet the specific needs of your child. We feel that our specialization allows us to have a comprehensive understanding of this disorder and how to best teach and communicate with your child.
